

JOB DESCRIPTION

ESS Executive - Software Developer Engineer

Compensation: Competitive Based on Experience

Location: Global | USA | Vietnam | Remote Opportunities

About the Opportunity

We are seeking a talented and motivated Software Developer Engineer to join their growing technology team.

This position offers an exciting opportunity to work on innovative software solutions, collaborate with cross-functional teams, and contribute to projects that drive digital transformation and business growth.

The ideal candidate is passionate about technology, enjoys solving complex problems, and thrives in a fast-paced environment where innovation and continuous learning are highly valued.

Key Responsibilities

Software Development

- Design, develop, test, and maintain high-quality software applications.
- Build scalable, secure, and reliable solutions that support business objectives.
- Participate throughout the software development lifecycle, from concept to deployment.

Collaboration

- Work closely with product managers, designers, business stakeholders, and engineering teams.
- Translate business requirements into technical solutions.
- Contribute to technical discussions and architecture decisions.

System Improvement

- Troubleshoot, debug, and optimize existing applications and systems.
- Improve software performance, reliability, and user experience.
- Support system maintenance and continuous enhancement initiatives.

Technical Excellence

- Follow software engineering best practices and coding standards.
- Participate in code reviews and knowledge-sharing activities.
- Stay informed about emerging technologies and development trends.

Qualifications

Education

- Bachelor's degree or higher in Computer Science, Software Engineering, Information Technology, or a related field.

Experience

- Proven experience in software development and application design.
- Experience delivering software projects in professional environments.

Technical Skills

Experience with one or more of the following:

- Python
- Java
- JavaScript / TypeScript
- C#
- C++
- Go

Additional experience with the following is preferred:

- Cloud Platforms (AWS, Azure, GCP)
- REST APIs and Microservices
- SQL / NoSQL Databases
- Git Version Control
- CI/CD Pipelines
- Agile Development Methodologies

Soft Skills

- Strong analytical and problem-solving abilities.
- Effective communication and collaboration skills.

- Ability to work independently and within global teams.
- Adaptability and willingness to learn new technologies.

Preferred Qualifications

- Experience with cloud-native applications.
- Familiarity with DevOps practices.
- Experience in AI, Machine Learning, Data Engineering, or Digital Transformation projects.
- Open-source contributions or participation in technical communities.

Why Explore This Opportunity

- Competitive compensation package.
- Flexible and remote-friendly work environment.
- Exposure to innovative technologies and global projects.
- Career growth opportunities within dynamic and fast-growing organizations.
- Collaboration with talented professionals across multiple industries.
